

$$S_{L,\varepsilon}(\mathbf{D}) = \{\mathbf{y} : \min_{\|\mathbf{s}\|_0 \leq L} \|\mathbf{y} - \mathbf{D}\mathbf{s}\|_2 \leq \varepsilon\}$$

● in-class samples; ○ complementary samples

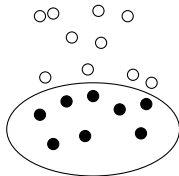

$$S_{L_0,\varepsilon_0}(\mathbf{D}_{\text{pre}})$$

a)

$$S_{L_1,\varepsilon_1}(\mathbf{D}_{\text{in-class}})$$

b)

$$S_{L_2,\varepsilon_2}(\mathbf{D}_{\text{DFDL}})$$

c)
