# Table of Contents

Acknowledgments	vii
Foreword by Professor Søren Holm	ix
Introduction	1
Chapter 1: Framing the ethical debate on enhancement technologies	4
1.1 What we talk about when we talk about “enhancement”	4
1.2 On the therapy versus enhancement distinction	10
1.3 Absolute versus positional goods	15
1.4 Arguments in favour and against enhancement	18
Chapter 2: From bench to bedside: Genetic technologies to choose children’s traits	26
2.1 Genetic enhancements and the ghost of eugenics	26
2.2 Eugenics and “ <i>Eligogenics</i> ”: past and present objections	39
2.3 Procreative liberty, and self-determination	48
2.4 Choosing deafness with preimplantation genetic diagnosis: an ethical way to carry on a cultural bloodline?	50
2.5 Disabilities, or just differences? An analysis of the expressivist objection	61
Chapter 3: From bench to track & field: Genetic technologies to enhance athletic performance	67
3.1 Gene transfer, gene enhancement and gene doping: infringing the spirit of sport?	67
3.2 Gene transfer for pain: A tool to cope with the intractable, or an unethical endurance-enhancing technology?	81
3.3 Genetic technologies to scout out children’s precocious talents	93
3.4 Direct-to-consumer genetic tests to “measure” athletic potential	96

3.5 Performance enhancement and anti-doping governance: towards doping under medical context?	107
Chapter 4: Shifting the debate on enhancements from the ethical to the political level	111
4.1 A proposal to alter the payoff matrix in professional sports: shifting the burden of proof of doping to sponsors	111
4.2 What can high-performance sports learn from the field of environmental sustainability?	115
4.3 The case for research on enhancements	123
4.4 A deliberative democracy approach to deal with moral disagreement in the bioethical debate	128
“Partially examined” conclusions	137
Bibliography	139
Index	165
