JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4006
Programme Full Name	Anthropology 人類學
Programme Short Name	ANTHROPOLOGY

Short Description

Anthropology is the study of human variability and diversity, as informed by the four sub-fields of biological anthropology, archaeology, cultural anthropology, and linguistic anthropology. The Anthropology programme at The Chinese University of Hong Kong has strengths in cultural anthropology – defined by the methods of in-depth interviewing and immersive participant-observation, and also offers courses in archaeology and cultural heritage studies.

Anthropology students come from both Arts and Science backgrounds, and they learn to think independently. Learning to appreciate and understand the various ways in which cultures may be organised, students will learn to see their own in a new light. Students learn how to conduct research, how to analyse evidence, and acquire strong verbal and written communication skills.

Anthropology provides a broad humanities and social science training that prepares students for a wide variety of careers in cultural heritage management, liberal studies, business, journalism, and other cross-cultural work.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4018
Programme Full Name	Chinese Language and Literature 中國語言及文學
Programme Short Name	CHI LANG & LIT

Short Description

The Department of Chinese Language and Literature, which has the longest history at CUHK, is renowned for its excellence in preserving tradition and striving for innovation. The Department offers rigorous training in Chinese language and literature. The curriculum affords a close examination of the characteristic features of the Chinese language, an in-depth introduction to theories of language and linguistics, and critical study of classical and modern Chinese literature. Students are expected to acquire solid understanding of the field in general while specialising in their own areas of interest, such as Chinese phonology and grammar, Qin-Han textual studies, Tang-Song poetry, modern Chinese fiction, and creative writing—all under the guidance of our erudite faculty members. The Department has long been emphasising diversified learning. We are collaborating with the Department of Chinese Language and Literature at Peking University to offer a dual undergraduate degree programme starting from 2019/20, which could combine the advantages of the both institutions to strengthen the learning experience of our students. In the academic year 2022/23, a double major programme in partnership with the Department of Translation (CHLL&TRANS) was introduced. This programme caters to students with a keen interest in both the theory and practice of C to E (Chinese to English) and E to C (English to Chinese) translation.

JUPAS Catalogue No. JS4032

Programme Full Name English
英文

Programme Short Name ENGLISH

Short Description

The English Major is a four-year programme that covers all the basic aspects of English language and literature, as well as offering an opportunity to pursue a particular area of study in depth. The first year consists of three components: communicative skills, linguistics, and literature. This will provide the groundwork for more specialized studies in the remaining three years, in which you may choose between courses in linguistics and/or literature. Our Applied English Linguistics courses explore the dimensions of English language through a variety of topics including phonetics, grammar, rhetoric, society and culture. These courses will not only offer you a theoretical perspective on the language, but also improve your own practical uses of English. Our English Literary Studies courses follow the development of English literature from the Renaissance to the present, and show how literary histories are connected across geographical borders. These courses range from those which cover more canonical literature such as Shakespeare, Romanticism, Modernism, to those which cover contemporary media such as film and graphic novels, to courses such as Creative Writing and Drama in Performance in which you can show off your own artistic flair. Additionally, in your fourth year, you will work on an independent research project of your own choice which will be supervised by a professor in the department.

Some of our more popular courses include: Literature and Film; Crime Fiction; Forensic Linguistics: Language as Evidence in Legal Processes; Hong Kong English; Reading Poetry.

Our professors put a high value on meeting regularly with students, providing instructive feedback, and resolving any concerns students might have. Our lectures engage with up-to-the-minute developments in literary analysis and applied linguistics, and our tutorials are conducted in a spirit of open, interactive, and respectful dialogue.

For more information about individual courses, the composition of the English Major, or employment opportunities after graduation, please visit our website.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No. JS4044
Programme Full Name Fine Arts
藝術
Programme Short Name FINE ARTS

Short Description
With a mission to advance traditional Chinese culture, bridge Chinese and Western art, and nurture local art professionals, the Department of Fine Arts offers a comprehensive and balanced undergraduate programme that prepares students for future careers as artists, art historians, museum curators, among other art-related professions. The programme achieves this mission in the following ways:

1. Focus on Chinese Art in a Global Context

A wide range of courses in Chinese art practices and history are offered alongside Western art history and studio training. Whenever possible, cross-field interactions are encouraged. Such an integrated approach reflects Hong Kong's position as an advanced, multi-cultural city.

2. Emphasis on Both the Practice and the History of Art

The Department places equal emphasis on studio and art history courses. As a result, our graduates are well-rounded and well-equipped for professional careers in the arts.

3. Career Preparation

The Department constantly revises its existing courses and introduces new courses that cater to the prevailing trends and needs of society. It also organises professional training courses and internship programmes to equip students with practical experience, thereby laying a solid foundation for their future careers as professional artists, art educators, and art administrators.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4056
Programme Full Name	History
Programme Short Name	歷史 HISTORY
Short Description	<p>The curriculum offered by the Department of History is designed to cultivate students' interest in human civilisations and to equip them with the ability to apply historical knowledge to their lives and careers.</p> <p>The curriculum embraces diversity and applicability as its guiding principles. Hong Kong is an international city in which the cultures of East and West meld seamlessly. CUHK has promoted international academic exchange from its inception, which has favoured and given rise to the Department's adoption of a comparative, interdisciplinary approach to curriculum design with public history as its research focus. Students are encouraged to analyse history from multiple and interdisciplinary perspectives. Courses are grouped into National/Regional History, Comparative History, Public History and Topic Studies, and students write a graduation thesis in their final year.</p> <p>In their first two years of study, students are required to take a number of basic courses, including Tradition and Transformation in Chinese History, Tradition and Transformation in Western History, Historiography, and Introduction to World History, as well as History for Today, a course offered by the History Department as part of the Arts Faculty's Core Package.</p> <p>Our Department has worked actively to nurture talented students. We have many scholarships supporting students, including the Wang Teh-chao Memorial Prizes, Professor Tsang Shui-lung Memorial Scholarship, the Sin Wai Kin Scholarship and the Professor So Hing-bun Scholarships. The Department has also introduced a series of internship programmes that give students opportunities to gain practical experience working in a variety of organisations. The Department also arranges overseas study tours to broaden students' perspectives. In addition, students have opportunities to participate in a variety of University-organised exchange programmes, including short visits to or study at universities in the UK, the US, Japan and elsewhere.</p>

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate-level Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4068
Programme Full Name	Japanese Studies 日本研究
Programme Short Name	JAPANESE STUDIES
Short Description	<p>The Department of Japanese Studies provides academic and professional training in the study of Japan and the Japanese language. The programme is designed to meet the growing demand for globally aware citizens, promote cultural and academic exchange, and facilitate communication and cooperation between Hong Kong and Japan.</p> <p>The programme provides training in critical approaches to Japanese society and culture, and is geared towards mastery of the Japanese language. All third-year students are required to spend one academic year in Japan and take unit-bearing courses at a Japanese exchange partner university. A key theme of the programme is a field research project. Second-year students are trained in research methodologies that they then implement in their third year of study in Japan, when they conduct research in the field. In the fourth year of study, students use the material collected during their field research to write an academic research paper.</p> <p>The programme offers three optional streams: (1) Business and Management; (2) Japan in Global Perspective; and (3) Japanese Language and Linguistics. Each stream provides specialised training in the named area and allows students to take courses from other relevant departments, including the Departments of Management, Sociology, Anthropology and Linguistics and Modern Languages. Students who select one of these streams must choose a relevant topic for their final-year project.</p>

JUPAS Catalogue No.	JS4070
Programme Full Name	Linguistics 語言學
Programme Short Name	LINGUISTICS
Short Description	<p>The Linguistics programme offers basic training in contemporary theories of language, and addresses such issues as the universal properties of natural language and the human mind, language acquisition in different modes and modalities, and language in different contexts of use. Students are encouraged to apply linguistic theories to the investigation of a wide variety of languages, including endangered languages, minority languages and sign languages. They will gain an appreciation of linguistics as an interdisciplinary field which crosses the traditional boundary between the arts and the humanities, drawing ideas and tools from various disciplines of cognitive science. At the practical level, linguistics training raises students' bilingual and multilingual awareness and sharpens their sensitivity towards the complexity of human language. Such training builds the linguistic resources necessary for students' careers and postgraduate study, and enables them to make informed judgments about the language issues of their own speech community. Students are offered an option to participate in a dual degree programme with Peking University, studying for two years in each campus. Upon successful completion of graduation requirements at both universities, students will be awarded the Bachelor of Arts in Linguistics by CUHK and the Bachelor of Arts in Chinese Language by Peking University. Students will not only benefit from the strengths of the two programmes, enriching their training in linguistics, but also widen their horizons through immersing in a different learning environment, enhancing their competitive edge for their further studies and career development. Students are also provided with possibilities to double major in Linguistics and Translation or Linguistics and Psychology.</p>

The Linguistics programme at CUHK includes the following areas of study.

1. Foundation and language awareness training:
 - Invitation to Linguistics, Phonetics I, Phonology I, Syntax I, Semantics, Exploring Grammar (Mandarin, Cantonese and English), and Modern Languages.
2. Core, applied and interdisciplinary electives:
 - *Core Linguistics*: Morphology, Phonetics II, Phonology II, Syntax II, Comparative Grammar, Language Survey in the Field, Sign Linguistics I: Phonetics and Phonology, and Sign Linguistics II: Morphology, Syntax, Semantics, and Special Topics in Linguistics.
 - *Language and Mind*: First Language Acquisition, Second Language Acquisition, Language Acquisition of Deaf Children, Bilingualism, Bilingual Acquisition, Psycholinguistics, Neurolinguistics and Special Topics in Language and Mind.
 - *Language and Culture, and Linguistic Applications*: Sociolinguistics, Language Disorders, Linguistics and Information Technology, Introduction to Sign Language and Bimodal Bilingualism, Sign Language in Education, Introduction to Sign Language Interpreting, and Special Topics in Applied Linguistics.
3. Research capability development:
 - Linguistic Argumentation I and II, Quantitative Methods for Linguistics, Research Practicum I and II, and Research Project I and II.

Upon completing the programme, students will have:

1. attained a body of knowledge about theories of language and language acquisition as well as the associated methods of analysis;
2. attained a body of knowledge about the relationship between theoretical linguistics and linguistics applied to other disciplinary studies;
3. attained a sharpened awareness of the languages used in the local community through their abilities in analysing, primarily but not exclusively, English, Cantonese, and Mandarin, in particular how these languages are structured and acquired as a linguistic system, and how they function socio-linguistically in the local community, the region and the world;
4. attained analytical and critical thinking capabilities and a sufficient set of

- research skills for work and postgraduate study;
5. attained high proficiency in English, Cantonese and written Chinese for the purpose of effective communication in academic discourse and the professional workplace, and at least functional proficiency in Putonghua;
 6. developed an appreciation and knowledge of Modern Languages for intercultural communication; and
 7. gained regional and/or international experience, nurturing their personal, intellectual and professional acumen.

Programme Full Name Music

Programme Short Name 音樂
MUSIC

Short Description The BA in Music programme at CUHK provides instruction in the study of music as a humanistic discipline and offers extensive opportunities for the development of practical skills. The Music Department's teaching team offers a wide range of expertise and has for decades nurtured important musicians of Chinese and Western music traditions. The Department's library and archival collections are among the most important in Asia. It has its own symphony orchestra, wind orchestra, and choir, in addition to ensembles devoted to Chinese music, jazz, early music, and new music.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4094
Programme Full Name	Philosophy 哲學
Programme Short Name	PHILOSOPHY
Short Description	The Department of Philosophy offers a diverse, balanced curriculum incorporating Eastern and Western philosophical traditions that meets international standards while maintaining national and regional relevance. The undergraduate curriculum aims to give students a strong liberal arts education, prepare them for advanced work in philosophy, and train them in critical thinking and communication skills applicable to a wide variety of professions. Students majoring in philosophy must complete a minimum of 72 course units. The core courses consist of Introduction to Philosophy, Logic, History of Chinese Philosophy I & II, History of Western Philosophy I & II, Philosophy and Human Conditions, Ethics, Epistemology and Metaphysics, and a capstone course in which students write an undergraduate thesis. In addition to these, students are required to take at least two courses in each of the three main areas, namely Chinese/Eastern Philosophy, Western Philosophy, and Philosophical Problems. The objective of this requirement is to ensure a well-rounded and balanced academic experience.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4100
Programme Full Name	Public Humanities 公共人文學
Programme Short Name	PUBLIC HUMANITIES

Short Description

The Bachelor of Arts in Public Humanities integrates the critical skills of Cultural Studies and practical know-how of Cultural Management, focusing not only on research and theories, but also on cultural practices, knowledge transfer, and public engagement. We aim to nurture a new generation of cultural mediators, producers, and professionals to meet the needs and challenges of contemporary society. We also aim to transform cultural practices for better community building.

This programme fosters students' critical and creative thinking, deepens their understanding of culture, heritage, and the arts; it also enhances their ability to communicate and collaborate with the public. We are committed to training students in research skills, cultural sensitivity, media literacy, curating, and policy-making, bringing the knowledge and values of the humanities into the cultural life of the general public. We also promote global citizenship and civic participation, and support sustainable development of various cultural enterprises in society.

(This new programme to be introduced in 2025 - 2026 is subject to confirmation of the University Senate of CUHK.)

Programme Full Name Translation
翻譯
Programme Short Name TRANSLATION

Short Description
The Department of Translation provides a coherent and comprehensive curriculum covering translation studies, literary and specialised translation, interpreting, and computer-aided translation. The programme places equal emphasis on practical and theoretical components - it is designed to prepare students for a variety of professions as well as postgraduate studies. The Department is committed to quality teaching and research. International scholars are invited to teach and conduct seminars and workshops for students. Double major and double degree options are offered in conjunction with the Department of Chinese Language and Literature, the Department of Linguistics and Modern Languages, and the Faculty of Law. The Department's teaching and learning are supported by two language labs equipped with state-of-the-art audio-visual facilities, conference interpreting systems and up-to-date software for computer-aided translation.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE ^{Note1}	3
CITIZENSHIP AND SOCIAL DEVELOPMENT ^{Note2}	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4136
Programme Full Name	Chinese Studies 中國研究
Programme Short Name	CHINESE STUDIES
Short Description	<p>BA in Chinese studies is a multi-disciplinary, primarily English-taught undergraduate programme which offers an integrated exploration of the complexities of Chinese history, economy, governance, business, culture, literature and contemporary society. With an emphasis on interactive teaching, international exchange, and immersive study, our programme is ideal for students intent on becoming globally-oriented China experts, cross-cultural communicators and network-builders. This major is designed for two streams of students distinguished by Chinese language fluency, i.e. 1) International Stream (IS) and 2) Chinese Native-Speaker Stream (CNSS). Students in each stream pursue a subset of learning offerings tailored to their language capacities while completing most of their course work in a shared learning environment in which international and Chinese-native speaker students learn from each other and pursue collaborative projects together.</p> <p>Special features of the programme include 1) adopting an interdisciplinary approach to exploring Greater China; 2) training students to gain an integrated understanding of China's past, present, and future; 3) offering interactive instruction in a "liberal arts" mode and immersive learning through "on-the-ground" sociocultural experience in Greater China; 4) emphasizing intensive empirical research to equip students with strong analytical and communication skills; 5) providing an international-oriented network for developing careers in Hong Kong, mainland China, and abroad.</p>

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4202
Programme Full Name	Integrated Bachelor of Business Administration Programme 工商管理學士綜合課程
Programme Short Name	INTEGRATED BBA
Short Description	<p>The Integrated BBA programme (IBBA) is the most popular business programme, providing students with the greatest flexibility to pursue comprehensive, integrated and high-quality business education. Under the IBBA programme, there are multiple options students can choose from to complete the 4-year degree.</p> <p>9 concentrations:</p> <p>Among all specialised options within the programme, students can freely choose one to two concentrations from the following 9 concentration areas:</p> <ul style="list-style-type: none">● Business Analytics● Business Economics● Finance● Entrepreneurship● Management of International Business● Human Resource Management● Marketing● Big Data and Quantitative Marketing● General Business <p>There is no quota limitation on each individual concentration, and students choose their concentrations based on their interests, strengths and aspirations. They can also adjust their areas of concentration along the academic journey. Students will only be required to declare their concentration(s) in their final year of study.</p> <p>Global experiential learning is an essential component to the IBBA curriculum. Since 2018-19, IBBA students have to complete global experiential learning before graduation. In general, more than 80% IBBA students participated in an overseas exchange programme before they graduate. CUHK Business School also provides ample internship opportunities for students to gain valuable on-the-job training and in-depth understanding of their targeted professions. More than 95% of IBBA students take up internships before they graduate and many of them receive return offers and become permanent employees of the companies where they have served as interns.</p> <p>Transfer-in option:</p> <p>Last but not least, students may opt for International Business and Chinese Enterprise (IBCE), which is a stream under IBBA. IBCE is a joint programme between CUHK Business School and the Darla Moore School of Business at the University of South Carolina (USC) that students will spend a year in USC among 4 years of study. It is the first and only undergraduate programme in Hong Kong with an emphasis on international business activities between the United States and China. It aims at training a group of future business leaders who are equipped with comprehensive knowledge about the complex yet delicate business environment in China and the United States. In IBCE, students are offered exclusive opportunities to explore the world and business by study trips, as well as the rare chances to train up their transnational mindset by working abroad.</p> <p>Double Degree, Double Major and Minor options:</p> <p>Students can also plan their double degree with the School of Journalism and Communication as a 5-year programme. They may also explore double majors with another business programme such as Professional Accountancy (JS4240), Quantitative Finance (JS4252), Insurance, Financial and Actuarial Analysis (JS4238) and also our newly introduced Financial Technology (JS4428) or minor programmes such as Entrepreneurship and Innovation and any other programmes offered by the University.</p>

2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4214
Programme Full Name	Global Business Studies 環球商業學
Programme Short Name	GBS

Short Description

Launched in 2005, Global Business Studies (GBS), as one of the most competitive programmes in Hong Kong, has been attracting the cream of secondary school graduates both from the local and non-local systems. GBS is a pioneer in the undergraduate business education in Hong Kong and has earned its reputation in the international education arena. Through an internationally oriented curriculum, we are committed to empowering highly aspiring students with distinct business acumen, cultural fluency and entrepreneurial mindset to become leaders who create meaningful impact in the global community. We offer expanded opportunities in top-notch university partners across Europe and North America.

Our programme is enriched with expanded capabilities and personalised learning pathway, which will bring a myriad of cultural experiences, experiential learning and networking opportunities in the major economic hubs across the regions. Students will be equipped with effective tools to develop real-world competencies and knowledge, as well as personal and professional attributes that will prepare them for success in their future careers. We are confident that these new features will provide students with more flexibility to tailor their learning experience to their own needs and help them stay ahead of the dynamic global business environment.

JUPAS Catalogue No. JS4226

Programme Full Name Hospitality and Real Estate
酒店旅遊及房地產

Programme Short Name HOSP & REAL EST

Short Description

Business Degree with Hospitality and Real Estate Focus

The Hospitality and Real Estate programme (HRE) is positioned as a business programme with an industry focus on hospitality and real estate. Our school is the first in the Asia-Pacific region to integrate hospitality and real estate research and education. HRE offers two major streams (Hospitality or Real Estate) and prepares students to work in diversified industries in lodging, MICE, theme parks and attractions, travel and tourism, valuation, leasing and transaction, consultancy, real estate development, finance and asset management.

The HRE programme offers a rich curriculum integrating theory with experiential learning opportunities, HRE puts students right in the heart of the fast-paced hospitality and real estate industries. Our teaching hotel-Hyatt Regency Shatin, the Hyatt Learning Center, demonstration kitchen, and the two SHTM-managed restaurants provide an ideal learning environment for theory-practice integration.

Professional accreditation & 6-months Internship experience

The HRE programme is accredited by AACSB, UNWTO and RICS. RICS is a globally recognized professional institution of chartered surveyors. All our students are required to take 6 months of internship before graduation.

Global Exposures

To enhance students' global perspective, the programme arranges extensive student exchange opportunities and study tours. Our students have exclusive opportunities to participate in exchange programme with Ivy-League Cornell University, a tri-lateral exchange with the University of Queensland and Mahidol University International College under the Asia-Pacific Hospitality Management Programme, the National University of Singapore and Ritsumeikan Asia-Pacific University in Japan. This creates a wide range of possibilities for students to gain international experience, which is a vital element in the curriculum.

The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4238
Programme Full Name	Insurance, Financial and Actuarial Analysis 保險、金融與精算學
Programme Short Name	I FAA

Short Description

The Insurance, Financial and Actuarial Analysis programme provides students with a conceptual understanding of, and the analytical skills necessary for a career in insurance, financial and actuarial analysis. It also gives them a sound knowledge of the structure, practices and business functions of the insurance industry. In response to the needs of the market, the programme is rooted in Hong Kong's institutional environment, supplemented with topics related to international issues and practices. Students in the programme receive training in actuarial and statistical techniques in both life and non-life insurance risk, as well as insurance operations, financial markets, portfolio management and financial derivatives. This paves students' way to managerial positions in the insurance and finance sectors.

JUPAS Catalogue No.	JS4240
Programme Full Name	Professional Accountancy 專業會計學
Programme Short Name	PROF ACCOUNTANCY
Short Description	<p>Accounting is the language of business. The BBA in Professional Accountancy (PACC) programme is designed to nurture professional accountants and specialists in accounting-related areas. The programme provides students with both accounting and business knowledge, skills and values that will help them become future leaders in the accounting and business communities. On top of academic study, the programme puts a lot of emphasis on developing students' leadership, analytical, problem-solving, and communication skills through co-curricular activities.</p> <p>Students may specialise in one of the following streams under the PACC programme:</p> <p><u>Global Accounting</u></p> <p>To cater for the growing demand for high potential, internationally-oriented business leaders, the Global Accounting stream is offered to elite accounting students who aspire to acquire a global mindset as well as an understanding of international accounting and business practices. Students may apply for this stream after completing their first year of study. Students in this stream will sharpen their skillsets and enrich their employment attributes through a range of workshops and non-local study trip. Students in this stream will also be awarded with scholarships based on academic merit.</p> <p><u>Global Tax and Governance</u></p> <p>The Global Tax and Governance stream is offered in response to an increasing interest of our students to know more about tax and governance issues as well as the profession's desire to have more accounting graduates who are better versed in these areas. Students under this stream are entitled to the maximum paper exemptions in taking the Chartered Tax Adviser (CTA) qualifying examination offered by the Taxation Institute of Hong Kong (TIHK). Students who are keen to develop a career in the tax advisory and compliance fields may apply.</p> <p><u>Finance for Accountants</u></p> <p>To maintain and promote the competitiveness of Hong Kong as one of the leading financial centres, it is vital to nurture talents who are knowledgeable in both accounting and finance areas. The Finance for Accountants stream is offered to help students explore the close relationship between accounting practices and finance. Utilising the accounting knowledge learnt in the core curriculum, students are expected to analyse financial information in formulating financial strategies in areas such as corporate finance, portfolio management and international finance.</p> <p><u>Accounting Analytics</u></p> <p>The term "data analytics" has been one of the hottest buzzwords across all industries recently. Massive portfolio of data presents enormous opportunities in enhancing such business areas as forensic accounting, auditing, marketing, productivity and risk management. An Accounting Analytics stream has been offered since 2019/20. The stream focuses on the development of an analytics mindset emphasising the skills, tools and hands-on practice with cases. Students who would like to be business specialists capable of understanding data analytics and building a robust system to manage data may apply.</p> <p>Apart from academic courses, the programme invites business professionals to speak to our students regularly with an aim to provide students with practical industry insights and broaden their business exposure. There are also ample opportunities to join exchange and internship programmes and to apply for scholarships.</p> <p>The PACC programme is well recognised by international and professional accreditation bodies, such as AACSB International, the Hong Kong Institute of</p>

Programme Full Name	Quantitative Finance 計量金融學
Programme Short Name	QFIN
Short Description	<p>The Quantitative Finance program has been designed to address the growing demand for highly skilled individuals who possess exceptional quantitative abilities and analytical abilities in today's globalized economy. This program equips students with a comprehensive understanding of the latest developments in the financial industry through specialized courses in finance, economics, mathematics, statistics, and information technology.</p> <p>By completing this program, graduates will acquire a strong grasp of financial investment instruments and will be highly qualified for employment in various sectors, including investment banking, corporate and commercial banking, consulting, accounting and financial services, as well as general management roles in both financial and non-financial corporations.</p> <p>To ensure a well-rounded education, the program places a strong emphasis on experiential learning beyond the confines of the classroom. Practical courses serve as a bridge between theoretical knowledge and real-world applications in banking and finance. Additionally, a guest speaker series provides ample opportunities for students to engage with industry experts and discuss current finance-related issues of interest.</p> <p>Students will have opportunities to participate in overseas exchanges and internships to broaden their horizons. The program has established robust networks and partnerships within the financial industry, and the positive experiences gained through internships have instilled confidence in companies to offer positions to students upon graduation.</p>

2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4254
Programme Full Name	Interdisciplinary Major Programme in Global Economics and Finance 環球經濟與金融跨學科主修課程
Programme Short Name	GLEF
Short Description	<p>Hong Kong has emerged as a major global financial hub. There is thus growing demand for finance professionals who possess knowledge of global economic and financial affairs and competence in carrying out financial analyses and operations.</p> <p>The Interdisciplinary Major Programme in Global Economics and Finance (GLEF) strives to provide students with solid interdisciplinary training in economics and finance in a global context, and to cater for societal needs by preparing graduates who have strong analytical training and the requisite global mind-set to overcome the future challenges of the banking and finance industry. Graduates are expected to embrace the virtues of integrity, honesty, and a sense of responsibility.</p> <p>This programme covers many topics that are not covered by conventional economics/ finance programmes. Some examples are:</p> <ul style="list-style-type: none">• Stabilization mechanisms such as the International Monetary Fund (IMF) and European Central Bank (ECB)• The emergence of China and its impact on the international economic and financial order• Corporate social responsibility and sustainability of financial institutions in a global context <p>The GLEF programme places heavy emphasis on internship and research experience, from which students can further develop their potential and consolidate their knowledge.</p> <p>Graduates can develop promising careers in multinational firms in the banking, finance and business consulting sectors or engage in financial research in public or private organisations.</p>

The Chinese University of Hong Kong - Programme Information

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate-level Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JUPAS Catalogue No.	JS4264
Programme Full Name	Bachelor of Business Administration (Integrated BBA Programme) and Juris Doctor Double Degree Programme 工商管理學士 (工商管理學士綜合課程) 及法律博士雙學位課程
Programme Short Name	BBA-JD
Short Description	Combining the strengths of CUHK Business School and CUHK LAW, the BBA-JD Double Degree Programme prepares students to assume leading roles in a variety of work sectors including but not limited to the legal profession, commerce, business and government service. The BBA-JD is a through-train and well-structured programme that allows students to graduate with an undergraduate and a postgraduate degrees in 5 years (as opposed to the 6 years for completion of an undergraduate degree and a JD degree separately). At the same time, students have flexibility to opt out and graduate with either a BBA degree, or a BBA degree with a Minor in Law. The rigorous but flexible approach gives students to customise their study options according to their interests, strengths and needs.
Remarks	The BBA-JD Double Degree is a 5-year full-time programme. Under this programme structure, students are required to: <ol style="list-style-type: none"> 1. Take both business and undergraduate law courses in the first 3 years; 2. Take both business and JD courses in year 4*; and 3. Fully engage with JD programme and take JD courses in year 5. <p>*Students are provided with an option to opt out from the BBA-JD Double Degree Programme and complete a BBA degree or a BBA degree with a Minor in Law in a 4-year time.</p>

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4276
Programme Full Name	Quantitative Finance and Risk Management Science 計量金融學及風險管理科學
Programme Short Name	QFRM
Short Description	<p>The BSc in Quantitative Finance and Risk Management Science programme (QFRM) is jointly administered by the Department of Finance and the Department of Statistics at The Chinese University of Hong Kong. It combines the strengths and features of two well-established and highly successful programmes from the respective departments: the Quantitative Finance programme and the Risk Management Science programme. The programme is consistently ranked at the top in terms of admission credentials among all quantitatively related programmes in Hong Kong and together with programmes like Global Business Studies and Medicine in CUHK.</p> <p>As a major financial service centre, Hong Kong has a growing demand for professionals with both quantitative finance and risk management science background. The programme provides state-of-the-art training in business and finance, risk management science, mathematics and statistics, and computing applications. By offering comprehensive academic and professional training, the programme aims to nurture competent finance and risk management professionals who can work in investment banking, corporate and commercial banking, consulting, accounting and financial services, as well as in general management in the financial and government sectors. In addition to our tailor-made coaching schemes, students are also encouraged to participate in overseas exchanges and internships.</p> <p>The programme has established strong networks and partnerships with the finance industry over the years. Outstanding performance during internship renders strong motives for companies to offer our students permanent positions upon graduation. The programme also enables students to build up a solid theoretical background for pursuing further study at the Master or PhD levels in economics, finance, actuarial science and insurance, mathematics, statistics and risk management science.</p> <p>The School of Mathematics at University of Edinburgh (UoE) has an agreement with the Department of Statistics at CUHK, which allows students to study mathematics at the undergraduate level for two years at CUHK and then transfer to UoE to complete two additional years of study. The QFRM programme is one of the programmes under the '2+2' agreement, and eligible students may apply for the dual degree programme. On successful completion of the fourth year at Edinburgh, students will graduate with two bachelor's degrees, one each from CUHK and UoE.</p>

The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4320
Programme Full Name	Human Movement Science and Health Studies 人體運動科學與健康研究
Programme Short Name	HUM MOV SCI & HEALTH STU
Short Description	<p>The programme aims to provide an interdisciplinary learning experience to students who are interested in the scientific and medical aspects of human movement, coaching, health and rehabilitation, and research-oriented activities in academia. The Human Movement Science explores the causes and consequences of human movement across the lifespan, including the prevention and treatment of acute and chronic conditions that cause disorders of movement. The Health Studies teach students to develop and apply principles of exercise-based preventative intervention, management of health and wellbeing, and rehabilitation to individuals who are injured or physically impaired. Students will examine human movement from different perspectives, including injury prevention, exercise rehabilitation, biomechanics, exercise physiology, health and fitness, motor control and motor development to equip themselves to contribute to major medical advances and more effective models of health care. This programme prepares students for professional career in coaching, rehabilitation, sports therapy, health-related sector, sport-related industrial, or exercise scientist.</p>

(This new programme to be introduced in 2025 - 2026 is subject to confirmation of the University Senate of CUHK.)

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4329
Programme Full Name	Physical Education, Exercise Science and Health 健康與體育運動科學
Programme Short Name	PHY ED, EX SCI & HEALTH
Short Description	The aim of the BEd Programme in Physical Education, Exercise Science and Health is to train physical education teachers, coaches, sports management and health promotion personnel for local academic institutions and government and private organisations. Completion of the programme leads to the award of a BEd degree, a qualification recognised as equivalent to a Postgraduate Diploma in Education, thereby entitling graduates to enter the teaching profession immediately after graduation. There is increasing recognition of the importance of health improvement through physical education and exercise. The Programme has four core components: health, physical education, exercise science and advanced professional skills, as well as capstone experience such as Teaching Practice, Internships and Research Project. Students must take 147 credits (including 104 units in their major programme) within five years to graduate. The programme trains students as generalists in sports and physical education or as specialists in the areas of exercise physiology, sports biomechanics, sports psychology, sports sociology, physical education pedagogy, health and fitness, and testing and measurement. Students may choose any of the aforementioned specialised topics as their graduation research project.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4331
Programme Full Name	B.A. (Chinese Language Studies) and B.Ed. (Chinese Language Education) 文學士 (中國語文研究) 及教育學士 (中國語文教育)
Programme Short Name	BA (CHI) BEd (CHI EDU)
Short Description	<p>This 5-year co-terminal double-degree programme offered by the Faculty integrates academic and professional training over the course of five years, and prepares students to become professional Chinese language teachers. The courses offered by the Department of Chinese Language and Literature enrich students' knowledge of Chinese language and literature, while the educational studies courses offered by the Faculty of Education develop their pedagogical content knowledge, teaching skills and ability to conduct educational research. The programme also includes school experience and teaching practice in local schools to ensure that students are able to put theories into practice.</p> <p>Students also have the opportunity to join an eight- to ten-week overseas language immersion programme. Partially subsidised by the HKSAR Government, this immersion programme helps students improve their Chinese language proficiency, sample Chinese culture and expand their experience of overseas educational practices.</p> <p>Upon fulfilment of the programme requirements, students are simultaneously awarded two degrees—a Bachelor of Arts (BA) and a Bachelor of Education (BEd)—which together is recognised as equivalent to a Postgraduate Diploma in Education (PGDE), ensuring that students meet the professional requirements needed to obtain qualified teacher status. Graduates of the programme are fully qualified to teach Chinese in local primary and secondary schools.</p>

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE ^{Note1}	3
CITIZENSHIP AND SOCIAL DEVELOPMENT ^{Note2}	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Grad Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, they will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some departments as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

Programme Full Name	B.A. (English Studies) and B.Ed. (English Language Education) 文學士(英國語文研究)及教育學士(英國語文教育)
Programme Short Name	BA (ENG) BEd (ENG EDU)
Short Description	<p>The co-terminal double degree programme is a five-year full-time undergraduate programme offered by the Faculty of Education, in collaboration with the Department of English and the English Language Teaching Unit of the Faculty of Arts. We aim at nurturing effective and qualified English language teachers for local primary and secondary schools.</p> <p>The programme focuses on three major disciplines: the study of English language and literature, educational issues, and English language teaching methodology. Students are afforded opportunities to integrate theories and classroom practices in school experiences and teaching practicums in both primary and secondary schools. Students will participate in an 8-week overseas immersion programme with the financial support of the HKSAR Government to further enhance students' English language proficiency, enrich their understanding of the cultures of English-speaking communities, and expand their experience of overseas educational practices. The two research-based courses embedded in the programme will help students synthesise subject knowledge and independent inquiry, and equip students with informed decisions in their future classroom.</p> <p>Graduates of the programme will be awarded two degrees: Bachelor of Arts and Bachelor of Education, including a recognition as equivalent to a Postgraduate Diploma in Education qualification. They are also considered to have met the HKSAR Government's Language Proficiency Requirement and exempted from the Language Proficiency Assessment for Teachers of English (LPATE) at Level 3.</p>

The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4386
Programme Full Name	B.Sc. in Learning Design and Technology 理學士 (學習設計與科技)
Programme Short Name	LEARNING DESIGN AND TECH
Short Description	<p>The BSc in Learning Design and Technology is a 4-year integrative programme jointly offered by the Faculties of Education, Engineering and Science. Its design is based on the latest re-formulation of the science of education in which education is cast as "a metadiscipline or discipline of disciplines" to equip learners with knowledge, competencies, and leadership to facilitate learning and development in and beyond the formal education settings. Graduates of the programme will be equipped with multi-disciplinary knowledge in education, technology, and science with education and learning sciences serving as the unifying threads. Not only will students be provided with internship opportunities to consolidate theory-practice integration, but they will also carry out research projects to synthesize multi-disciplinary knowledge and action-science competencies.</p> <p>Programme features:</p> <ul style="list-style-type: none">• Integrative, multi-disciplinary programme in education, technology and science• Theory driven, action-science oriented, and lab-based learning approach• Integrated STEM education with technology-based and multi-media instruction in multicultural contexts• Service learning competencies through education and community engagement• Research in technology, science and transdisciplinary studies in and beyond STEM education• Articulation with the PGDE in technology- and/or science-related teaching and other research-based postgraduate programmes in education and/or technology-related disciplines

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate-level Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4408
Programme Full Name	Mechanical and Automation Engineering 機械與自動化工程學
Programme Short Name	MAEG
Short Description	The Mechanical and Automation Engineering (MAE) Programme of CUHK aims at offering solid education and cutting-edge research opportunities around two aspects of engineering: (1) the proper physical interaction of engineering systems with the physical world through force, heat, and energy ("Mechanical"); and (2) the self-operability of the systems demanding minimum intervention from humans ("Automation"). MAE seeks to design and control such interaction based upon fundamental knowledge on rigid body mechanics, fluid mechanics, thermodynamics, and conservation of mass and energy. It is also desired that engineering systems do not just do what is instructed but exhibit certain degree of autonomy in their operations, based upon knowledge on mechatronics, robotics and control.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4412
Programme Full Name	Computer Science and Engineering 計算機科學與工程
Programme Short Name	COMPUTER SCI & ENG

Short Description Computer Engineering (CENG) and Computer Science (CSCI) are four-year programmes offered by The Department of Computer Science and Engineering (CSE), which is the first computer science department in Hong Kong that started to launch its undergraduate major programme in 1978.

While both CENG and CSCI are rigorously founded on problem solving by programming, data structure, and algorithm design, CENG distinguishes itself from others by offering specialized training for students in areas such as mobile embedded systems, microprocessors, VLSI design, hardware-aided security, and super-computing. On the other hand, CSCI focuses more on software innovation and offers diverse specialized areas such as artificial intelligence, bioinformatics, big data analytics, cloud computing, computer and network security, database and information systems, graphics and computer vision, and machine learning.

Students will first be admitted to the CSE department through the department-based Computer Science and Engineering programme. After the first year of study, eligible students will be invited to declare their major in CENG or CSCI. Students with outstanding HKDSE results and good academic performance in the first year of study are guaranteed their first choice of major.

JUPAS Catalogue No.	JS4416
Programme Full Name	Computational Data Science 計算數據科學
Programme Short Name	CDAS

Short Description

The Computational Data Science (CDASN) programme is designed to manufacture mathematical, technical, and analytical skills to create solutions to lead data-driven decision-making. Data scientists build intelligent systems to understand, interpret, manage and derive key knowledge from big data sets. It aims to equip students with the latest in large-scale data processing, computational statistics, machine learning, data mining, and data visualisation, while also developing the skills to effectively communicate data insights to key stakeholders, etc. Such capabilities enable students to develop cutting-edge massive data analytics and management solutions that are of practical interest to academics, industry, and society.

Programme Full Name Financial Technology
金融科技學

Programme Short Name BENG FINTECH

Short Description

The Financial Technology (FinTech) programme aims at providing students with essential knowledge to apply new technology, especially information technology and data science techniques, to a variety of financial services. After four years of all-round education, students are expected to be able to derive and develop financial and managerial insights from big data, design and engineer innovative solutions to meet financial service needs, optimize financial decisions in complex business environments, and understand and analyze the social, economic, security, and legal impact of their solutions. Students admitted by the FinTech programme can also apply for the double major programme in FinTech and IBBA as well as the dual degree programme in FinTech and Financial Mathematics.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4434
Programme Full Name	Electronic Engineering 電子工程學
Programme Short Name	ELEG
Short Description	The CUHK Electronic Engineering (EE) programme was established in 1970 and is accredited by The Hong Kong Institution of Engineers (HKIE). The EE programme provides the broadest and most foundational engineering training for modern society. The courses offered are designed not only to convey fundamental knowledge in mathematics, science, and engineering but also to focus training on one or more advanced EE subject areas. Students will have strong hands-on skills in circuit design, programming, and development of electronic components, systems, and networks, which will prepare them to advance the state-of-the-art technologies and to break new grounds.
Remarks	For details of the undergraduate curriculum, please click here .
Programme Website	http://www.ee.cuhk.edu.hk

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE ^{Note1}	3
CITIZENSHIP AND SOCIAL DEVELOPMENT ^{Note2}	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate-level Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the score will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4462
Programme Full Name	Energy and Environmental Engineering 能源與環境工程學
Programme Short Name	EEEN

Short Description

The Energy and Environmental Engineering programme at CUHK provides the engineering knowledge and training for its graduates to tackle a broad spectrum of energy issues pertaining to renewable, environmental and building technologies. The programme puts forth a strong platform and broad-based perspective for learning and understanding the relations and trade-offs between energy and environment, and the ensuing engineering challenges in attaining viable solutions. The programme provides three focused study streams including Sustainable Energy Technology, Green Building Technology (involving courses from the School of Architecture) and Environmental Engineering (involving courses from the Geography and Resource Management programme and Earth and Environmental Sciences programme).

JUPAS Catalogue No.	JS4470
Programme Full Name	Materials Science and Engineering 材料科學與工程學
Programme Short Name	MATERIALS SCI & ENG
Short Description	<p>Materials are the underpinning component of almost all kinds of technologies. Innovative materials are critical to the advancement of microelectronics, advanced manufacturing, new energy and green technology, biomedicine and biotechnology, aviation and aerospace engineering. In the Government's I&T Development Blueprint, advanced manufacturing, new energy vehicles, and semiconductor chips are particularly highlighted as the focused technology industries to be promoted for their strategic significance in Hong Kong.</p> <p>The Materials Science and Engineering programme (MASE) is intended to be untraditional and forward-looking to anticipate the future need in targeted technology areas. It aims to provide comprehensive education on scientific knowledge and engineering skills across multiple disciplines related to advanced materials and their innovative applications. Observing the high demand for scientists and engineers in the areas of advanced materials, the MASE major curriculum emphasizes on emerging materials with new functions, including nanomaterials, energy materials, electronic materials, smart materials, biomaterials, etc.</p> <p>(This new programme to be introduced in 2025 - 2026 is subject to confirmation of the University Senate of CUHK.)</p>

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4513
Programme Full Name	Nursing 護理學
Programme Short Name	NURSING

Short Description

The five-year Bachelor of Nursing Programme prepares students for registration as a general registered nurse with the Nursing Council of Hong Kong. Graduates of the Programme are qualified to promote health of people and provide quality care for patients in today's increasingly technological and complex health-care field. The main subjects of study include biological and behavioural sciences, health promotion and maintenance, nursing practice and theory, nursing research and information technology. Students also gain experience in the care of clients in both community and hospital settings.

The Programme offers the following advantages:

1. Internationally-recognised reputation
2. Full clinical supervision by teachers from the University and clinical mentors from hospitals
3. Strong theory-practice link through integrated clinical block practice
4. Shared teaching by internationally renowned medical experts and clinical nurse specialists of the Faculty of Medicine
5. Support from territory-wide hospitals and community agencies

Learning Outcomes:

Upon completion of the programme, students are able to:

1. provide evidence-based care that supports physical and homeostatic functioning, promotes psychosocial functioning and life-style changes, protects against harm, recognizes the patients as a member of the family unit and community, and leverages on effective use of the health-care delivery system.
2. apply appropriate clinical and nursing therapeutic techniques unsupervised.
3. apply the principles of health promotion in meeting the health needs of individuals, groups, families and communities.
4. demonstrate effective skills in communicating with patients, carers, peers and the health care team.
5. coordinate the care of clients in hospital and community settings.
6. apply technology in the processing of information for nursing practice and research.
7. provide patient-centred care using the nursing process as a problem solving approach.
8. recognize, explain and manage health problems using basic social, behavioural, clinical sciences and managerial principles.
9. display appropriate professional attitudes and apply relevant ethical and legal principles in the practice of nursing.
10. demonstrate competent decision-making, clinical reasoning and judgment skills to make decisions and take actions.
11. demonstrate understanding of self and engage in ongoing lifelong personal development.
12. recognize the roles of nurses within a health service institution and their influences on its development, and engage in the development of nursing as a health-care profession.
13. uphold the professional code of conduct.
14. incorporate cultural factors into the practice of nursing.

General Entrance
Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE ^{Note1}	3
CITIZENSHIP AND SOCIAL DEVELOPMENT ^{Note2}	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

Programme Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{NOTES}	3

NOTES:

- (1) The two subjects may include:
 - (i) 2 elective subjects; or
 - (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II.
- (2) Biology, Chemistry and Physics are preferred subjects, among which the subject with the highest score will be given heavier weighting.

REMARK:

The programme accepts specific Applied Learning course(s) with "Attained with Distinction" in an elective subject.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4525
Programme Full Name	Pharmacy 藥劑學
Programme Short Name	PHARMACY

Short Description

The Bachelor of Pharmacy (Honours) degree is awarded by CUHK upon satisfactory completion of at least four years of full-time study. To be considered for registration by the Pharmacy and Poisons Board as a practising pharmacist in Hong Kong, graduates must complete a one-year pharmacy internship training approved by the Board.

The fundamental theme of this programme is the science and practice of pharmacy in relation to the health care needs of Hong Kong. The Pharmacy Programme aims at preparing graduates to become integral members of the health-care team with primary responsibility in managing the safe and cost-effective use of medications and other therapies for the treatment and prevention of disease.

The following areas are covered in the curriculum:

- Biomedical Sciences (Anatomy/Physiology/Biochemistry/Microbiology)
- Pharmaceutical Chemistry
- Pharmaceutics, Dosage Form Science, Pharmacokinetics
- Pharmaceutical Research Techniques
- Pharmacogenomics
- Contemporary Pharmacy Practice and Management
- Herbal and Traditional Chinese Medicine
- Pharmacology and Therapeutics
- Pharmacy Clerkships and Research Project

Upon the completion of the Pharmacy programme, the graduate is:

- prepared with scientific and professional knowledge and skills for contemporary pharmaceutical practice;
- able to adopt a systematic approach in analyzing and solving problems in the manufacture and quality assurance of pharmaceutical products;
- able to communicate effectively with patients, peers, other health professionals and the public;
- confident and competent in counselling patients and clients on prescription, non-prescription and consumer health products;
- able to identify and appropriately utilize drug information resources to assist with patient-specific drug therapy monitoring;
- confident in making decisions on patients' drug therapy and recommending appropriate treatment; and
- able to build upon his/her knowledge and skills and engage in lifelong continuing education and professional development

The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No. JS4537

Programme Full Name Public Health
公共衛生

Programme Short Name PUBLIC HEALTH

Short Description

With the emergence of SARS, MERS, Ebola and recent COVID-19, all people dedicated to working in a public health discipline play an important role in providing advice to the government for public health measures and public education in mitigating the risk of infection spread locally and globally. At the vanguard of public health education, the JC School of Public Health and Primary Care of the Faculty of Medicine launched the first public health undergraduate programme in Hong Kong, Bachelor of Science in Public Health (BSc in Public Health), in 2009.

Besides infectious diseases, there is a range of public health issues threatening our health and the health system including climate changes, increasing epidemiology of chronic diseases, challenges with the ageing population, occupational safety, drug abuse, internet addiction, mental health, unhealthy lifestyle, and sustainability of healthcare financing and service provision, etc. The BSc in Public Health Programme curriculum provides students who have an interest in public health with the latest knowledge and valuable insights into population health issues. Concepts that students will learn and experience include the following: social determinants of health, environmental impact on health, healthy lifestyles, public health law and ethics, biostatistics and epidemiology, emergency preparedness and disaster response, infectious diseases, and health care system and policy.

JUPAS Catalogue No.	JS4542
Programme Full Name	Chinese Medicine 中醫學
Programme Short Name	CHIN MEDICINE
Short Description	<p>This six-year programme consists of pre-clinical study (4.5 years) and clinical practice (1.5 years).</p> <p>The pre-clinical programme extends over four and a half academic years. Students are required to complete courses including subjects in basic medical and life sciences, principles of Chinese medicine applications, Chinese medical concepts and theories, Chinese medicine classics, and various specialties in Chinese medicine (such as internal medicine, gynaecology, paediatrics, orthopaedics and acupuncture).</p> <p>The last one and a half years of study is devoted to bedside training. Students will spend time at Chinese medicine hospitals practicing in various specialty wards. Considering the lack of Chinese medicine hospitals in Hong Kong at the moment, we have obtained full support from the Guangzhou University of Traditional Chinese Medicine, and the Shenzhen Hospital of Traditional Chinese Medicine, which will provide clinical training programmes and hospital facilities for our students.</p> <p>In addition to the training in hospital settings, students will attend out-patient clinics of Chinese medicine in Hong Kong in order to gain practical experience as general practitioners in treating common diseases. Each student will attach to a clinic under mentorship by qualified Chinese medicine practitioners.</p> <p>Graduates of this programme are qualified to take the Chinese Medicine Practitioners Licensing Examination conducted by the Hong Kong Chinese Medicine Council and become registered Chinese Medicine Practitioners if they pass the examination.</p>

Short Description

This programme aims to provide graduates with an integrated and holistic training in biomedical sciences. Adopting a multi-disciplinary approach and coupling theories with practical and hands-on training, the programme will produce solidly trained graduates for diversified career paths in scientific research, health system policy and management, or clinical, pharmaceutical, diagnostics and healthcare related professions, as well as leaders with global perspective.

Upon completion of the Programme, graduates will have:

- had a strong, broad-based foundation and advanced specialised knowledge in selected areas of biomedical sciences and research;
- developed a broad range of skills and values, including a capacity for lifelong learning and conducting biomedical research;
- acquired skills to apply critical and creative thinking to analyse problems, to identify ethical dilemmas relating to biomedical sciences and research, and to offer feasible solutions;
- demonstrated good understanding of the policy issues and strategic management pertaining to public health, pharmaceutical industry, diseases and medicine;
- been equipped with practical and hands-on training and exposure to real-life scenarios through experiences in a biomedical research laboratory or within an industrial setting;
- developed effective interpersonal and communication skills.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE ^{Note1}	3
CITIZENSHIP AND SOCIAL DEVELOPMENT ^{Note2}	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate-level Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

Programme Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	3
Elective Subject(s)	Minimum Level
ANY 1 SUBJECT ^{NOTE}	3
One of the following elective subjects:	
CHEMISTRY	3
BIOLOGY	3

NOTE:

The subject can be any elective subject (Category A) or Mathematics (Extended Part) Module II.

REMARK:

The programme accepts specific Applied Learning course(s) with "Attained with Distinction" as an extra elective subject.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4601
Programme Full Name	Science 理學
Programme Short Name	SCIENCE
Short Description	<p>The Faculty of Science offers a flexible, broad-based admission scheme that allows students to explore their interests in 11 science major programmes during their first year of study before declaring a major. The 11 participating major programmes are:</p> <ul style="list-style-type: none">● Biochemistry● Biology● Biology and Chemistry (Double Major Programme)● Cell and Molecular Biology● Chemistry● Earth and Environmental Sciences● Food and Nutritional Sciences● Mathematics● Molecular Biotechnology● Physics● Statistics <p>Students admitted to SCIENCE can declare any one of these programmes as their major. The characteristics of the SCIENCE broad-based admission scheme are as follows:</p> <ul style="list-style-type: none">● The scheme offers extensive academic advice to assist students in the selection of their major.● There is no quota for a specific major, and students are guaranteed admission to their programme of choice.● Depending on their preparation, students may declare their Major at the time of entry or at the end of Year 1 or 2 [#]. <p>To better prepare students to select a major, a flexible first-year curriculum and Faculty Package of courses have been designed to equip them with:</p> <ul style="list-style-type: none">● a broader view and better appreciation of various science subjects;● better preparation for studies in a science major programme; and● the ability to tackle problems in a comprehensive and integrative manner. <p>In their first year, students take courses from the Faculty Package, which contains five subject groups, including Chemistry, Life Sciences, Mathematics, Physics and Statistics. Each group consists of several courses that are available to students with different science backgrounds and interests. Students generally study at least three 3-unit courses from the Faculty Package, the first of which is typically chosen from their desired major programme. The second course is chosen from a relevant subject area and the third from one of the remaining groups.</p> <p>Science Technology and Research Stream (STARS) https://www.sci.cuhk.edu.hk/STARS</p> <p>Undergraduate research is an integral part of our curriculum. The Science Technology and Research Stream (STARS) is a research-oriented stream designed for students with strong academic ability and interest to gain wider exposure and research experience during their undergraduate studies. Students in STARS are offered research and training opportunities starting from their 1st year, under the supervision of our professors. Students can obtain broader exposure to relevant topics by joining international conferences, seminars and outgoing exchange. The STARS designation will be officially recorded on the academic transcripts for those who successfully complete all of the requirements.</p> <p>[#] Students interested in the Biology and Chemistry Double Major Programme should declare their major at the time of entry or at the end of Year 1.</p>

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4648
Programme Full Name	Earth and Environmental Sciences 地球與環境科學
Programme Short Name	EESC
Short Description	Global climate change, environmental pollution, natural hazards, biodiversity loss, and the current energy and food crisis are all critical issues of public concern. The Earth and Environmental Sciences Programme (EESC) will equip students with the latest knowledge and technical skills to observe, understand, analyse, and model the systems and processes that drive natural and anthropogenic global environmental changes.

Highlights

In this programme, particular emphasis is placed on multidisciplinary and combined theoretical observational approaches to understand the aforementioned problems and formulating potential solutions. Students will acquire a strong comprehensive foundation in the dynamics of the Earth and its environment, with options to specialize in the following streams to suit their background, interests and career objectives such as Atmospheric Science, Geology and Geophysics, and Environmental Science and Technology. Students will be given opportunities to gain valuable quantitative and analytical skills, and build their capabilities via laboratory work, field studies, numerical modeling and programming experience, seminars, workshops and research projects. Further enhancing these are exchange opportunities at overseas universities as well as internship opportunities in the Hong Kong Observatory and other government agencies, geotechnical firms, and environmental organisations.

Career Prospects

Upon graduation, students are well prepared for jobs in the government, NGOs, and industries including, but not limited to, geotechnical survey and engineering, meteorological and marine services, as well as climate, energy and environmental consulting. Students can also pursue further studies or embark on careers in the educational sector.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4690
Programme Full Name	Enrichment Stream in Theoretical Physics 理論物理精研
Programme Short Name	THEORETICAL PHYSICS

Short Description

Physics is the study of basic regularities behind various complex phenomena in the physical world. The objects of study range from the tiniest such as quarks in a proton to the largest such as the universe of which our solar system is a minute part, and from systems as simple as free particles to those as complex as typhoons. The goal of the Enrichment Stream in Theoretical Physics is to offer a solid and engaging curriculum to young people with an enquiring mind, to bring them into contact with frontier knowledge, and to engage them in beginning to contribute to the advancement of the understanding of nature and the application of the knowledge.

The Enrichment Stream in Theoretical Physics is designed for students who have a good foundation in secondary school physics and mathematics; it will provide them with a solid grasp of fundamental concepts, analytic, numerical, computational, experimental, and research skills, and teach them to appreciate and understand the important applications of physics in the modern world. Learning activities include lectures, small-group discussions, problem-solving sessions, laboratories, seminars, projects, and research. In addition to core courses, students can select from a pool of elective courses focusing on theoretical physics and mathematics. The Enrichment Stream in Theoretical Physics places special emphasis on project learning and building research capabilities. The Stream is designed for students seeking postgraduate studies at the master's or doctoral level upon graduation.

Learning in the Enrichment Stream in Theoretical Physics is further supported by a number of special academic and extra-curricular enhancement programmes. These programmes include mentoring, summer research in the department, research exchanges with overseas and mainland universities, and internship in the Hong Kong Observatory, the Hong Kong Space Museum, or in various companies. The Department of Physics also offers higher degree programmes leading to MSc, MPhil and PhD degrees. Further information can be found in the physics department webpage <http://www.phy.cuhk.edu.hk>.

CHINESE LANGUAGE ^{Note1}	3
CITIZENSHIP AND SOCIAL DEVELOPMENT ^{Note2}	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate-level Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4719
Programme Full Name	Risk Management Science 風險管理科學
Programme Short Name	RISK MGT SCI
Short Description	<p>The programme, administered by the Department of Statistics, is intended for students seeking a career in financial and insurance institutions, with a strong interest in scientific methodologies. As an interdisciplinary subject, students enrolled in this programme receive not only solid training in advanced mathematics and statistics, but also comprehensive exposure to finance, economics, accounting, and computer science. The core programme comprises pragmatic courses in numerical methods, portfolio management, financial economics, data structures and accounting principles, which equip students with essential techniques for the highly quantitative work in the financial industry.</p> <p>To meet the increasing demand for talent in data science, the programme has launched a new study stream of risk analytics from the 2017-18 academic year onwards. The new study stream is tailored for students pursuing frontier knowledge in big data technologies in the financial industry. Upon graduation, students are well-equipped to become professional risk managers with a strong background in data science and data analytics.</p>

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4725
Programme Full Name	Biotechnology, Entrepreneurship and Healthcare Management 生物科技、創業與醫療管理
Programme Short Name	BEHM

Short Description

This interdisciplinary undergraduate programme is designed for talented students who would like to develop a career in biotechnology entrepreneurship, business analysis, and/or healthcare management, to capture the emerging opportunities in Hong Kong, the Greater Bay Area, and beyond. The programme brings together the Faculties of Science, Medicine, and Business Administration at The Chinese University of Hong Kong to co-develop a brand-new, integrated curriculum with active learning as the core. In addition to a compilation of complementary courses in Biomedical Sciences, Business Administration, Molecular Biotechnology, and Public Health, capstone courses will be co-taught by the professors in different Faculties to upgrade students' problem-solving ability using cross-disciplinary knowledge. Opportunities of mentorships and internships from the relevant industrial, service, and venture capital sectors will be sought to allow the students to learn through connecting knowledge with real-world problems.

Missions

The programme aims to develop talents with a broad base of complementary knowledge, who shall demonstrate the following essential attributes:

- an entrepreneurial mindset with ground-breaking ideas to translate the advancement of biotechnology, biomedical sciences, and healthcare into commercial opportunities
- an ability to integrate a broad base of knowledge in biotechnology, biomedical & health sciences, data analytics, and business management to provide innovative and cross-disciplinary solutions
- an ability to communicate with collaborators of diverse backgrounds and participate in the management of healthcare operations and development.

Highlights

- Cross-disciplinary training by Faculties of Science, Medicine, and Business Administration
- Biotechnology knowledge with an emphasis on the applications on biomedical and environmental issues
- Analytical skills to connect scientific knowledge to "real-world" business
- Sense and skills in entrepreneurship and healthcare management

Career Prospects

- Leaders in the start-ups in advanced life science, health-technology, and environment solutions
- Business consultants and analysts for science and technology firms
- Management in healthcare and medical institutes

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate-level Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4824
Programme Full Name	Economics 經濟學
Programme Short Name	ECONOMICS
Short Description	<p>CUHK Economics Department offers a major programme which provides rigorous training on the application of economic theories and statistical tools on analysing key modern day issues. To further achieve a balance between theory and application, our programme emphasises the development of key skills, especially mathematics, statistics, and programming. In addition to a comprehensive selection of courses covering all aspects of economics, students also have access to various databases and modern quantitative software (including Bloomberg Terminals) in our own specialised computer labs. Our all-round training enables students to develop their own unique economic and financial insights, thereby preparing them for the increasingly dynamic modern world.</p> <p>CUHK Economics equips students with the logical mindset, theoretical frameworks and quantitative skills to excel in numerous business, finance and academic professions. Graduates of CUHK Economics have been very well placed in many prestigious multinational financial and academic institutions.</p> <p>To give you a taste of the questions that we attempt to answer, included hereunder is a sampler:</p> <p>“How would you value stocks like Uber or Tesla, which hardly make any profit?”</p> <p>“If McDonald's has to cut down 10% cost, how would you advise it to do so?”</p> <p>“How would assets with negative BETAs help build your client's investment portfolio?”</p> <p>“Think emails and online videos. Why are they free? When should a company charge its customers?”</p> <p>“How would a hike in Ireland's tax rate affect iPhone's supply chain?”</p> <p>“How to construct an AI algorithm for a virtual bank using big-data?”</p> <p><u>CUHK-Tsinghua Dual Undergraduate Degree Programme</u></p> <p>In collaboration with Tsinghua University, CUHK Economics Department also offers a Dual Undergraduate Degree Programme in Economics from 2021/22 academic year. Graduates of this programme will receive two bachelor's degrees - BSc in Economics from CUHK and Bachelor of Economics from Tsinghua University. This innovative programme emphasises critically numerous important international economic issues as well as eruditions in the Chinese economy through the unparalleled strengths and advantages of the Economics departments of CUHK and Tsinghua University. The student body of this programme is expected to be international and diverse. Prospective students are also expected to spend half of the study period in Tsinghua University. The potentials and implications of this Dual Undergraduate Degree programme are incredibly exciting and pioneering.</p> <p>Key highlights of this Dual Undergraduate Degree programme include:</p> <ul style="list-style-type: none">● Two of the most prestigious bachelor's degrees in Asia● Best economics training in Asia● Rigorous, challenging and rewarding experience● China vision and global perspective● Access to two major job markets and develop two alumni networks

2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4836
Programme Full Name	Geography and Resource Management 地理與資源管理學
Programme Short Name	GEO & RES MGT

Short Description

Our world faces numerous challenges, including globalisation, climate change, resource depletion and environmental pollution. Geography, a long-standing discipline that makes use of a variety of techniques, has demonstrated tremendous flexibility in helping to identify solutions to these challenges. Resource management, particularly in the context of the relationship between mankind and the environment, has always been a focal point of interest and inquiry in geographical studies. Our department strives to pursue the geographical knowledge and effective resource management pertinent to the sustainable development of the human race. Our programme equips students with knowledge and skills of geographical sciences, with an emphasis on integrating different subjects and specialisations. Our curriculum maintains a balance between theories and applications and provides broad and solid training through a wide variety of teaching and learning activities. Students are also educated to cultivate attitudes and values that will enable them to become socially and environmentally responsible citizens in today's globalised world.

The curriculum has evolved to include four areas of concentrations: (a) Geo-spatial Data Science; (b) Physical Environment and Resource Management; (c) Urban and Regional Development; and (d) Smart Sustainable Cities. We adopt a wide range of teaching and learning activities from the very first year of study, and most of the courses offered by the Department use interactive methods and encourage interactive learning. For example, tutorials, laboratory and field work are adopted to expose students to experiential learning. Field study courses are conducted both locally and outside Hong Kong with students having the option of taking part in field studies in China, Africa, Australia, Europe, North America, Thailand, Singapore, Malaysia and Japan, among other destinations.

In line with the educational values of the University, students graduating from our department will possess broad knowledge which will provide them with diverse employment and career development opportunities. They will also understand the theories and methods of geography and resource management. Graduates will have the ability to keep abreast of the latest socio-economic development and environmental issues.

Furthermore, students will have the ability to adopt a problem-based learning approach to strengthen vital and generic skills such as critical thinking, problem solving, self-managed learning etc., and they will acquire communication skills and interpersonal skills and the ability to adapt to individual and group work. In the final year of study, students will be required to take a capstone course that involves independent research and a final year thesis. Finally, having gone through the curriculum, students will possess an awareness of the concept and ideology of sustainable development and thus become sensitive to environmental and resource management issues as well as have a global outlook with emphasis on local, regional, and national, and global issues in order to better understand Hong Kong, Mainland China and the world.

Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other Language (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, the subject(s) will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4838
Programme Full Name	Urban Studies 城市研究
Programme Short Name	URBAN STUDIES
Short Description	<p>The interdisciplinary Urban Studies programme is designed to allow students to explore the complexities and challenges of the rapidly evolving urban world, global urbanisation processes and various strands of urbanism. The programme encourages students to reflect on the socio-integrated policy-making, planning, design and management. In addition to the active learning of urban development theories, the rigorous application of skills and techniques to urban analysis and a contextual understanding of the world's best sustainable urban practices, students may choose to declare one of the following areas of concentration: urban planning and design, the urban environment, urban policy and governance, or smart sustainable cities.</p> <p>The Urban Studies programme is jointly organised by the Department of Geography and Resource Management and the School of Architecture, with strong input from urban-studies-related courses offered by various departments in the Faculty of Social Science and the Faculty of Arts. The curriculum is designed to be inter-disciplinary, theoretically and scientifically solid and professionally attractive for achieving the following objectives:</p> <ul style="list-style-type: none">• To help students understand major challenges of global urbanisation processes such as resources depletion, environmental degradation, climate change, population migration, social polarisation and poverty issues;• To teach students to appreciate the existing environments of urban space and places to understand the contested processes of social interaction;• To equip students with a solid knowledge foundation in frontier urban research and development;• To provide students with exceptional insights in urban history, cultural roots, and metropolitan perspectives in Hong Kong and Mainland China;• To equip the students with the understanding of the relationships between the socio-economic context and physical fabric of urban conditions and develop basic skills in urban and environmental planning and design, together with urban policy making and governance;• To train students as future leaders in the urban world with cutting-edge knowledge on related issues; and• To prepare students for work in a wide range of fields as diverse as urban design and planning, environmental protection and management, property development, public policy and social enterprise domains. <p>The Urban Studies programme contains four basic components:</p> <ul style="list-style-type: none">• Faculty Package• Basic Knowledge<ul style="list-style-type: none">◦ Foundation courses: Introduction to Urban Studies; Introduction to Spatial Planning; Urban Sustainability; Urban Economic Studies; Urban Design and Place Making; Studies of Cities in Comparative Perspective; Essentials of the Land Development Process; and Urban Planning Theory and Practice◦ Methodology and Statistics courses◦ Field Studies• Specialisation<ul style="list-style-type: none">◦ Concentration courses (choose one concentration)<ul style="list-style-type: none">■ Urban Planning and Design■ Urban Environment■ Urban Policy and Governance■ Smart Sustainable Cities◦ Capstone course: a thesis or project related to one of the above areas of concentration• Elective Courses

2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4848
Programme Full Name	Government and Public Administration 政治與行政學
Programme Short Name	GOVT & PUBLIC ADMIN

Short Description

The Government and Public Administration (GPA) programme provides all-round training in political science. The subject is comprised of three primary specialisms that span the areas of politics, public administration and international relations. The programme offers more than forty courses that cover core areas such as political theory, comparative politics, international relations, and public administration. While a large proportion of courses focus on the Greater China region, the programme is renowned for its diversity of courses that encompasses the area of global politics. These courses cover fundamental political, economic and social issues in different parts of the world and enable students to foster an enhanced global vision and mindset for the future.

2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4850
Programme Full Name	Journalism and Communication 新聞與傳播學
Programme Short Name	JOURNALISM & COMMUN
Short Description	<p>The School of Journalism and Communication is dedicated to educating communication experts adept at information technology and capable of generating high-quality communication content, products and services. The School is also dedicated to research into various important aspects of communication.</p> <p>This programme places equal emphasis on theoretical and professional ethics. It offers three professional tracks: Journalism, Advertising and Public Relations, and Creative and New Media. Based on their particular interests, students can specialise in one or two professional tracks, or select courses from different tracks.</p> <p>The School is equipped with state-of-the-art facilities, including high definition (HD) television and radio studios, a Blackbox Studio, two Creative Hubs for HD video editing and numerous networked computer laboratories.</p> <p>The programme offers four practicum groups to students: <i>U-Beat</i>, <i>Varsity</i>, <i>Pinpoint</i>, and <i>Creative Media Laboratory</i>. Students can choose to participate in the writing, editing and production of one of the School's two news practicum magazines: <i>U-Beat</i>, which is published in Chinese, or <i>Varsity</i>, published in English. Students can also acquire hands-on experience conducting social and commercial campaigns by working at <i>Pinpoint</i>. Those who join the <i>Creative Media Laboratory</i> gain knowledge and skills in audio and visual media production. In addition, the programme arranges summer internship placements for all students.</p>

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No. JS4858

Programme Full Name Global Communication
全球傳播

Programme Short Name GLOBAL COMM

Short Description

The Global Communication programme offers a specialized pathway to equip students with knowledge and skills to master the production, circulation, and reception of media and information in our globalized world. It is the first of its kind to combine a rigorous training in journalism and communication studies and a guaranteed academic exchange. Students will gain professional insights from local veteran practitioners, cutting-edge knowledge by world-leading communication scholars, and global mindset by studying in one of our partner universities across Asia, Europe, and North America.

The programme stresses both theory and practice. The theoretical component of the programme examines the influence of the macro social and political environment on the global flow of media and information, as well as the challenges and opportunities brought by global digital platforms. The practical component engages students with real-world production of the School's English news practicum magazine, *Varsity*, and elective courses in integrated marketing communication and creative media. There is also an overseas field study where students, under the supervision of their teachers, conduct original research and media production.

Graduates are prepared to enter a wide range of careers worldwide, including transnational corporations, multinational news organisations, global advertising and public relations organisations, international entertainment enterprises, non-government organisations, inter-governmental organisations, and more.

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Grad Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, they will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4862
Programme Full Name	Psychology 心理學
Programme Short Name	PSYCHOLOGY

Short Description

Psychology is the scientific study of all aspects of human behaviour. Psychologists are interested in better understanding sensation, perception, cognition, emotion, personality, human development and abnormal behaviour. The undergraduate programme balances theory and application to provide students with the basic knowledge and research methods required in the study of psychology, and a strong foundation for public service and further studies in psychology and other disciplines. The cross-cultural orientation of the Department's teaching and research provides students with an international perspective for their future career development in a global setting.

Psychology is closely related to other subject areas that involve the study of human behaviour, and students who are familiar with psychology will find it easy to pick up these other subject areas.

Our undergraduate curriculum is comprehensive, offering more than 40 courses in various research areas. In addition to basic courses, such as General Psychology and Introduction to Statistics and Research Methods, the following five areas of concentrations are available:

- **Cognitive Science:** The study of memory, cognition, language, and human intelligence, and their neural underpinnings.
- **Education and Human Development:** The psychology of personal growth, educational psychology, and the psychology of child, adolescence and adults from a developmental perspective.
- **Social and Industrial-Organisational Psychology:** Social, cross-cultural, and industrial and organisational psychology.
- **Clinical and Health Psychology:** Abnormal and health psychology, neuropsychology and related areas.
- **Training in Guided Self-Help for Low Intensity Psychological Interventions:** Application of evidence-based psychological principles in the treatment of common mental disorders and the promotion of mental health using the guided self-help approach.
- **Computational Psychology and Artificial Intelligence:** The primary aim of this concentration is to immerse students in the interdisciplinary study of the mind, bridging the gap between diverse fields such as engineering, computer science, linguistics, neuroscience, cognitive science, and philosophy. The concentration is designed for students who are passionate about delving into the intricate workings of the human mind, leveraging cutting-edge technology and innovative approaches to better understand cognitive processes and mental phenomena. By minimizing the focus on traditional mathematical foundations, this program ensures a more accessible and engaging learning experience for students from various backgrounds, empowering them to thrive in the ever-evolving landscape of psychology and technology.

This programme appeals to motivated and energetic students who are interested in understanding and studying behaviour. It also intrigues students with analytical minds who enjoy the process of conducting scientific research.

Programme Full Name Social Work
社會工作

Programme Short Name SOCIAL WORK

Short Description

The Social Work programme aims to train students to be professional social workers who are knowledgeable, analytical and empathetic. The programme helps students achieve both conceptual and practical competence in comprehending social problems and helping people in a social context with increasing complexity. Its emphasis includes students' self-understanding, small group teaching, intensive fieldwork practicum, and international exposure with opportunities for overseas placement. Graduates are eligible to apply for 'Registered Social Worker' status and legally assume professional social work positions. Employment rates of our graduates are extremely favorable in the past years.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4886
Programme Full Name	Sociology 社會學
Programme Short Name	SOCIOLOGY
Short Description	<p>Sociology is the scientific study of society. Sociologists study the social lives of people and groups to understand how social factors shape one's mind and behaviour. The Sociological Imagination helps you understand social phenomena from different perspectives.</p> <p>The Department of Sociology at CUHK has the longest history and the most comprehensive curriculum of its kind in Hong Kong. We currently focus on six research clusters: Crime and Deviance; Economic, Politics & Society; Family, Gender and Sexuality; Population, Health and Migration; Stratification and Education; and Computational Social Science. All of our teaching staff excel in their fields of specialization.</p> <p>Students are required to complete a capstone thesis project before graduation. In addition, students can choose to concentrate on one or more of the three areas of concentration: 1) Research Methods and Data Analytics, 2) Sociology and Social Policy, and 3) Society, Sustainability and Technology.</p> <p>Sociology students are often eager to explore the world. On average, 20+ students leave for exchange in overseas universities annually. To prepare students for their future career, the Department offered 20+ internship opportunities in the summer of 2023.</p> <p>The Department now offers a new four-year double-major option in collaboration with the School of Journalism and Communication and a BSSc (sociology)-Juris Doctor double-degree option in collaboration with the Faculty of Law.</p> <p>We provide one of the best sociological training in the region. According to The Quacquarelli Symonds World University Rankings by Subject (Sociology) 2024, our Department is ranked the 29th in the world and 2nd in Asia.</p>

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE ^{Note1}	3
CITIZENSHIP AND SOCIAL DEVELOPMENT ^{Note2}	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2
Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS ^{Note3}	3

Note 1:

Applicants with very special circumstances may be granted waivers of this requirement on a case-by-case basis. For details, please click [here](#).

Note 2:

For Liberal Studies (LS) subject taken in 2023 or before, a Level 2 or above will be considered as "Attained" in Citizenship and Social Development. The LS level will not be considered in calculating admission scores.

Note 3:

The two subjects may include:

- (i) 2 elective subjects; or
- (ii) 1 elective subject and Mathematics (Extended Part) Module I or Module II or Other (A2 or above in French / German / Spanish; or N3 or above in Japanese; or Graduate Korean).
- (iii) For Integrated Science or Combined Science subject(s) taken in 2023 or before, they will be considered as an unspecified elective subject where applicable.

Note 4:

"Attained with Distinction I/II" in Applied Learning subjects will be accepted by some programmes as an extra subject for awarding bonus points. For details, please click [here](#).

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

Most programmes offered by CUHK consider the best results in the same subject taken by a candidate in more than one sitting of HKDSE. Some programmes may have specific arrangements and the admission scores of candidates seeking admission on the strength of results from more than one sitting of HKDSE may be adjusted. Details of calculation of scores in more than one sitting of HKDSE for the 2025-26 entry will be finalised and posted at the admissions website (admission.cuhk.edu.hk).

JUPAS Catalogue No.	JS4893
Programme Full Name	Data Science and Policy Studies 數據科學與政策研究
Programme Short Name	DSPS
Short Description	Innovative and Interdisciplinary Curriculum

The BSSc in Data Science and Policy Studies (DSPS) programme focuses on linking the fields of data science and policy science to equip students with the essential knowledge, skills and capacity to design innovative, big data-driven, and evidence-based policy solutions for complex problems in society. We offer a comprehensive, balanced curriculum on fundamental aspects of data, statistical and machine-learning knowledge, policy design and analytical techniques, as well as hands-on experience with data science software and visualisation tools.

The DSPS curriculum will:

- Equip students with a full suite of skills in data science and AI, including skills in mathematics and advanced statistics, advanced programming for data science, machine learning, computer simulations, AR/VR applications, social network analysis, natural language processing, and advanced data visualisation. This suite of skills is what students need to become competent data scientists;
- Enable our students to apply these skills in one or more of the following applications: architecture, communication, economics, gender studies, international relations, public governance, sociology, social work and urban design; and
- Allow students to design their own concentration area and build their expertise in this area by choosing a mix of relevant skills and multidisciplinary courses (e.g., data science, migration and population policy).

Experiential Learning Programmes and Activities

In addition to classroom learning, the DSPS programme offers a wide range of experiential learning activities to apply what the students have learnt to address real-world issues and develop a global mindset, including:

- visits to high-technology companies and AI-powered design institutes in Hong Kong and overseas,
- internships,
- overseas exchanges, and
- capstone projects.

JOINT UNIVERSITY PROGRAMMES ADMISSIONS SYSTEM
2025 Application for Admission
The Chinese University of Hong Kong - Programme Information

JUPAS Catalogue No.	JS4903
Programme Full Name	Bachelor of Laws 法學士
Programme Short Name	LLB
Short Description	<p>The Bachelor of Laws (LLB) is a four-year programme that offers intellectual and personal development through the medium of law. Students will explore a range of engaging and important subjects, while developing their critical analysis and creative problem-solving skills and enhancing their ability to construct detailed, well-reasoned, compelling arguments. These are life-long skills that will support graduates in whatever careers they choose, be they in law or other fields.</p> <p>The first two years are almost entirely focused on compulsory subjects, grouped into the themes of Foundations of Law, Public Law (which governs relations between the state and citizens) and Obligations (which governs relations between citizens). In their final two years, students will combine a few remaining compulsory subjects with courses they select from a range of electives, allowing students to develop further expertise in legal areas of their choice. Students may also choose to specialize in the Global Law or Chinese Law streams, indicated a degree of specialization in that particular area that will be reflected on their transcripts.</p> <p>LLB students have a few opportunities to obtain double degrees. Please visit the Faculty website for further details.</p>
